Skills

- Javascript (ES6)
- CSS3
- Material UI
- TypeScript
- Git / Github / Gitlab
- Amazon Cognito
- React
- Jest
- AWS Amplify
- HTML5
- Scrum & Agile
- Formik & Yup

Professional Experience

- Jan 2023 – Apr 2023 **Frontend Developer Intern, Sparq** 
- Collaborated with a 9-person Scrum team to design and develop a complex JA scheduling application.
 - Presented weekly formal application demos to company executives, effectively communicating project progress and gathering feedback for further improvements.
 - Acquired extensive knowledge and practical experience in agile methodologies and applying them to drive project success and team performance.
- Jun 2017 – Jun 2021 **Unit Deployment Manager, United States Air Force**
- Langley AFB, USA
- Obtained Secret security clearance to work with sensitive information and protect national security interests.
 - Performed asset management on DOD munition assets, including inspections, loading and unloading during deployments, and tracking physical location to ensure accurate inventory management.
 - Managed training and deployment taskings for 250 airmen, ensuring personnel readiness and mission success.

Projects

- Sparq JA Scheduling Application**, <https://laykenv.github.io/sparqSchedulingApp/> 
- Designed and developed a meeting scheduling application from scratch as a part of the Sparq internship program with React and leveraging back-end APIs for seamless integration.
 - Utilizes key libraries like Formik, Yup, Material UI, Axios, React Router Dom, and Storybook to enhance functionality and user experience.
 - Leveraged the power of AWS Cognito and AWS Amplify to design and implement a secure authentication system for seamless user login and access control.
- Pokemon Battle App**, <https://laykenv.github.io/pokemon-battle-app/> 
- Developed a Pokemon battle application using Typescript and React, allowing users to assemble their own team and battle against a rival.
 - Integrated PokeAPI to fetch Pokemon data, providing a comprehensive database for users to choose from and showcasing my proficiency in API integration.
- Portfolio Site**, <https://laykenv.github.io/portfolio/> 
- Designed and developed a custom portfolio site using React and modern CSS to showcase my skills and featured projects to potential employers.
 - Created a visually engaging user experience through custom animated CSS backgrounds and smooth scrollTo elements.
