📂 Projects

Pokemon Battle App, *https://laykenv.github.io/pokemon-battle-app/* ⧉
- Allows the user to choose a team of Pokemon and battle against their rival.
- Built with Typescript, React, and unit tested with Jest.
- All Pokemon data pulled from PokeAPI.

Ferrari E-commerce App, *https://laykenv.github.io/shoppingcart/* ⧉
- A Ferrari car e-commerce frontend web application with a fully functioning shopping cart, product page, and clean landing page.
- Users can add, modify, and remove items from their cart.
- Utilized React Router for seamless navigation throughout the site.

Portfolio Site, *https://laykenv.github.io/portfolio/* ⧉
- My portfolio site built with create-react-app and styled with modern CSS.
- Custom animated CSS background.
- Utilizes smooth scrollTo elements.
